SUMMARY

Forward Deployed Engineer and Computer Engineering graduate who builds software end-to-end and embeds with the business it serves. Over the past year at IzTechValley I have independently owned and shipped several production websites and platforms — from first commit to live, in front of real users. I specialize in the space between a product and the systems a business already runs on, connecting apps to **ERP** and other back-office systems.

EXPERIENCE

Forward Deployed Engineer — IzTechValley Hebron, Palestine | Jul 2025 – Present

- Independently built and shipped **iztechvalley.com** end-to-end — the company's marketing website — owning architecture, UI, launch, and ongoing SEO and performance.
- Solely designed and delivered **petromall.iztech.net** end-to-end, a multi-section product catalog and landing platform, from first commit to production.
- Single-handedly built and shipped **naab-app.com** end-to-end, including the performance and reliability work behind a smooth experience across mobile and desktop.
- Built the **Barakat admin panel** end-to-end — the operations dashboard for a live POS SaaS platform used by Palestinian businesses.

Hardware Engineer — Gigabyte Ltd Nicosia, Cyprus | Feb 2025 – Jul 2025

- Configured POS environments end-to-end (hardware setup, OS installation, and network integration) and resolved hardware and software issues to minimize downtime across client sites.

Flutter Frontend Developer (Internship) — Gigabyte Ltd Nicosia, Cyprus | Jun 2024 – Oct 2024

- Built cross-platform mobile UIs with **Flutter and Dart**, integrating REST APIs across Android and iOS, and collaborated with the team on UI troubleshooting.

KEY PROJECTS

ERP E-Commerce Template — Full-Stack E-Commerce Platform 2026 – Present

Next.js 16 · TypeScript · ERPNext (Headless) · REST API · base-ui · next-intl · Zod · Bun

- Building an open-source, clone-per-store e-commerce platform — one Next.js 16 codebase serving a public SEO/SSR storefront and an owner dashboard on a **headless ERPNext** backend.
- Architected the ERPNext-native API layer inside Next route handlers (**service-token + httpOnly session-cookie auth**, leak-safe error registry) and a **35-component, RTL-aware UI library** localized in Arabic, English, and Hebrew.

Dairy Market — POS & Inventory — Client Project 2026 – Present

Next.js 16 · TypeScript · ERPNext (Headless) · REST API

- Scoped requirements on-site with a retail client and am building a full point-of-sale and inventory system on a **headless ERPNext** backend.
- Covers a product catalog with flexible units of sale, real-time stock and reports, in-shop checkout, and supplier management with invoices, account statements, and PDF documents.

Shelfie — Full-Stack Web Application shelfie-book.vercel.app

React · TypeScript · PostgreSQL (Neon) · Tailwind CSS · TanStack · Zod · Resend

- Built a social reading app end-to-end — UI/UX, frontend, and backend — for tracking your bookshelf and discovering what others read.
- Implemented **JWT authentication**, a PostgreSQL database on Neon, transactional email via Resend, half-star ratings, and threaded comments in a mobile-first UI with dark mode.

DevBoard — Frontend Web Application mt-devboard.vercel.app

React · TypeScript · TanStack Router · Zustand · dnd-kit · Zod · Motion

- Built a Kanban task manager with drag-and-drop boards, due dates, and priorities (localStorage persistence); designed the UI/UX and logo from scratch and deployed to production.

Portfolio — Personal Website mohammed-tamimi.vercel.app

React · TypeScript · Tailwind CSS · Motion · Vite

- Designed, built, and deployed my personal portfolio end-to-end — a fast, animated single-page site showcasing my projects, skills, and experience.

EDUCATION

B.Sc. Computer Engineering (Honours) — Cyprus International University Nicosia, Cyprus | 2021 – 2025

GPA 3.00 / 4.00 · Key Courses: Data Structures & Algorithms, Software Engineering, Databases, Computer Networks, Operating Systems.

SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Next.js, React Native, Tailwind CSS, TanStack (Router / Query / Table), shadcn/ui, Motion, React Hook Form, Zod

Backend & Data: Node.js, Elysia, REST API design, PostgreSQL, ERP, Payload CMS

Tooling & Deploy: Git & GitHub, Husky, ESLint, Prettier, Commitlint, Vite, Bun, Vercel, Railway

AI Tools: Claude AI, GitHub Copilot · **Languages:** Arabic (Native), English (Professional), Turkish (Basic)
